WORK EXPERIENCE

Analytics Manager

Paypal

06/2025 - Present

Mentoring two junior resources and taking responsibility for the successful delivery of their work and tasks.

- Identified and resolved a \$20M defect affecting order-based transactions for retail merchants, preventing revenue impact; mentored two junior resources and ensured successful project delivery.
- Leveraged Claude AI and Playwright MCP to automate detection of PayPal Button and BNPL placement, reducing manual effort by ~40–50% and improving speed and consistency of competitive and merchant analysis.
- Identified and prioritized customer pain points from multiple data sources, analyzed contact rates, and evaluated financial impact across experiences and products, influencing data-driven product and operational decisions.

Senior Business Intelligence Engineer

Amazon Development Centre

07/2021 - 06/2025

Received over 5 accolades from business stakeholders. Mentored 5+ resources and helped them learn the business and get up to speed.

- Worked with 10 teams, onboarded datasets from 5+ clusters, and automated diverse financial processes, resulting in significant policy changes, cost savings of approximately \$43M, tax savings of approximately \$35M, and the equivalent of 4 full-time employee roles.
- Provided input and recommendations on technical issues to data engineering and software engineering teams. Contributed to data design, data modelling, and data extracts/transforms.
- Optimized and organized data pipelines from the Finance Operations Data Lake, resulting in near-real-time data with a lag of 4–8 hours, down from the previous 36 hours.
- Built a Machine Learning algorithm (FCR – Firmographic Credit Risk) using XGBoost, rating \$12B (80%) worth of customers, compared to the previous \$3B using Dun & Bradstreet. Interpreted the model using SHAP and automated the process using AWS tools.

Data Scientist

Tata Consultancy Services

02/2019 - 07/2021

Converted many reactive use cases of the Loss Prevention team into proactive use cases.

- Conducted data analysis to identify opportunities for improvement in Amazon retail shrink reduction throughout the e-commerce supply chain. Built Machine Learning solutions for PQV across all geographies. Used Gains and Lift charts to present model insights to customers, resulting in savings of \$30M.
- Worked for Amazon's FinOps reporting team, analyzed and identified key metrics, and prepared business-critical dashboards using ETL and Tableau visualization.
- Established relationships among counterparties (customers/suppliers) using cross joins and NetworkX, helping to proactively identify fraud.

Data Analyst

Capgemini

08/2016 - 02/2019

- Created complex SQL queries and worked on data visualization for ANZ Bank using Splunk and Tableau.

SKILLS

SQL

Advanced Data Analysis

Python

Business Intelligence

Problem Solving

Predictive Analytics

Tableau

Executive Communication

Data Strategy

Machine learning

BigQuery

ETL

Data Pipeline

AWS (S3, Glue, Redshift, SageMaker)

AI : Claude, ChatGPT, Prompt Engineering, Playwright MCP
